Logical TA @EvilPanda

Nov 03 25 · 1 tweets

How do you get the skill to pick coins for DLMM?
Was it luck?
Was it because I was smart?
Was it cos I use some bot to help me pick?
NO, it was all pure backtesting and forward testing.

Hard work pays off, I did endless backtesting and forward testing when I was still trying to make it, when my strategy have not clicked. I recorded all the data I could find and removed/added even more data as I see fit. Record the data for new coins and see how they performed without putting your money first, eventually you will see a pattern that will give you confidence to risk your money on.

After doing it over and over again every single day, one day you will look at the coins data and without recording it you can tell straight away if it is a good or bad coin. Because that backtesting and forward testing is already in your brain. Don't be a lazy ass, there is no easy money in this. Work for it and put it inside your brain, noone can take that away from you.

Read the quoted post to know what the numbers mean. My current method may have changed slightly from the original, but he logical basis is still the same.

"The time you spend learning to trade is the price you pay for freedom later."

@LP Army @MeteoraIDN @Meteora
